

Lyric Pro AI — Commercial-Use License Summary

Plain-English summary of the rights included with your purchased kit. Not a substitute for the full Commercial Use Policy and Terms.

What you can do

Use the lyrics, jingle copy, cover art, and audio delivered in your kit in your business marketing — including paid ads, social media, websites, radio, on-hold messaging, podcasts, in-store playback, TikTok/Reels/YouTube, and other promotional channels for the purchasing business.

Where you can use it

Worldwide, in any medium, for as long as your business operates. Non-exclusive: Lyric Pro AI retains the right to license similar generated works to other customers, but will not resell your specific finished kit.

Who owns it

You own your kit for commercial use as described above. Copyright protection of AI-generated material may depend on the level of human creative contribution and applicable law; we encourage you to edit, arrange, and adapt outputs to add your own creative touch.

Modifications

You may edit, remix, translate, shorten, and re-record the lyrics and audio to fit new campaigns without repurchasing.

Attribution

No attribution to Lyric Pro AI is required in your ads or marketing.

What's not allowed

Reselling raw outputs as-is on stock marketplaces or beat/lyric libraries; registering the kit with a Performing Rights Organization as an original composition without meaningful human authorship; using outputs to impersonate a real recording artist or brand; generating content that defames, misleads, or targets protected classes.

Originality & third-party rights

We do not generate lyrics by copying specific artists, songs, voices, or protected works. You are responsible for clearing any third-party names, trademarks, product references, or user-supplied material you include in your prompts.

Free tier

Free samples are for personal evaluation only. Commercial rights require a paid plan or kit purchase.

Refunds & support
